

IT Tech Camps

Summer 2023 | In-person events

You're invited to attend an in-person Apple Tech Camp focused on deploying Apple devices. Join your Apple Field Engineering team to make sure your company is ready to deploy macOS Sonoma, iOS 17, and iPadOS 17 as soon as it's released. We'll be there to help your team begin the testing and certification process for your company, help file feedback and bug reports, and register deployment blockers. We'll also have some fun challenges!

Events are held at multiple locations across the U.S., so it's easy for your team to attend. Administrators should bring both production and test devices, including a macOS device for testing and certification, even if you want to test iOS 17 and/or iPadOS 17. Test devices should have the latest beta software installed and be enrolled in Apple Business Manager. Your macOS device should have the latest version of Configurator and the correct privileges to apply policies and .mobileconfigs to your devices.

Participants will benefit by:

- Learning more about the AppleSeed for IT program, Mac Evaluation Utility (MEU), and Feedback Assistant
- Testing and providing feedback on the latest versions of Apple's new software
- Receiving guidance from Apple on Apple IT fundamentals
- Discovering best practices that can help improve existing IT workflows
- Navigating the AppleSeed for IT portal, including Test plans, What's new, Release notes, and Software
- Certifying Apple's latest OS releases
- Learning tips and tricks for filing feedback
- Connecting with Apple systems engineers and fellow Apple IT administrators

Locations and Dates

Note: All registrants will be added to a waitlist. Official confirmation will follow.
