

IT Tech Camps

Spring 2023

You're invited to our annual IT Tech Camps series. This event will highlight how Apple is helping IT professionals standardize their business with simplified deployments, secure by design interfaces, and manageable software updates. Sign up for the sessions below to learn how you can enable your organization with Apple IT!

Best Practices for Deploying Apple Products

Deploying Apple devices has been made simple through strategic hardware-level protections over the past decade. Join this session to learn about the latest deployment and management updates to setup your organization for success. We will cover getting started with MDM, applying security policies, and discuss new management capabilities for Mac, iPhone, and iPad.

Wednesday, April 5

10:00 to 11:00 a.m. PDT | [Register >](#)

2:00 to 3:00 p.m. PDT | [Register >](#)

Implementing Platform SSO with Okta and Jamf

New in macOS Ventura, Platform SSO enables identity integration at the login window providing an unmatched user experience. Enrollment SSO provides a new streamlined enrollment process for BYOD devices. Join this session to learn first hand how you can adopt these new identity features with support from Okta and Jamf.

Wednesday, April 12
