## Encore Viewing Sessions

These sessions are available in an encore format that you can watch at any time. Below is a description of each session and the links to access them online through Webex. You'll need to register for each session. The password for all sessions is *apple1*.

### Upgrading to Apple School Manager

Upgrading from Apple Deployment Programs to Apple School Manager gives you more options than ever before for easily preparing, deploying, and managing Mac and iPad for your students and teachers. Come learn best practices to prepare for your upgrade. [View session >](#)

### Creating Managed Apple IDs in Apple School Manager

Join us to learn how you can use Apple School Manager to create Managed Apple IDs—accounts designed specifically for schools that enable students and staff to personalize their device and access key services from Apple. These accounts are built for students of all ages, are intended to make it easy for schools to create and manage accounts at scale, and are designed to meet the privacy and security needs of schools. [View session >](#)

### Buying Apps and Books in Apple School Manager

This session will provide everything you need to know about funding, purchasing, and distributing apps and books for iPad and Mac with Apple School Manager. Discover how to leverage education volume discounts, and learn tips and tricks on getting the most from Apple School Manager from an Apple system engineer. [View session >](#)

### Mac Deployment and Management

Join us to learn how to deploy and manage macOS Mojave, the latest operating system from Apple, and get a walk-through of its technical features. An Apple system engineer will review recent updates in how macOS works with device management solutions and Apple School Manager to help IT teams get Mac into the hands of their users seamlessly. [View session >](#)

### Everyone Can Code

We think everyone should have the opportunity to create something that can change the world. So we've designed a program that lets anyone learn, write, and teach code. Come discover how to reignite learning through coding. [View session >](#)

### Everyone Can Create

Join us to learn about Everyone Can Create, a new program from Apple designed to help unleash the creative potential in every student through photography, video, music, and drawing. [View session >](#)

### Content Caching

Content caching is Apple's free, built-in network caching solution on macOS designed to minimize bandwidth usage for Apple content. It speeds up downloading of software distributed by Apple and data that users store in iCloud by saving content that local Mac, iOS, and Apple TV devices have already downloaded. Saved content is stored in a content cache on a Mac, and is available for other devices to retrieve without going out over the Internet. Come learn how content caching improves the user experience for accessing Apple content on Apple devices. [View session >](#)

### iPad and Student Assessment

iPad is a powerful device for all types of student assessment, from daily formative assessment to high-stakes testing. Join this session to see how iPad can support daily learning, formative assessments, and online state tests. Experience formative assessment on iPad and see how Automatic Assessment Configuration secures iPad for summative assessments. [View session >](#)

## Live Webcasts

Attend these live sessions at the times listed below. A description of each session is also included with a link to access each one online at the scheduled time. You'll need to go through an initial registration process and then can attend your sessions of choice.

---

### **Discover Schoolwork and Classroom: Powerful Tools for Teaching**

Mondays at 10:00 a.m. CT

Learn how to manage iPad devices during class, easily distribute and collect materials, assign activities within apps, follow student progress, and collaborate with each of your students—all in real time. These new teaching tools help educators and students take advantage of the creative power of apps on iPad. You'll also be able to participate in a live Q&A with an Apple system engineer. [Register >](#)

### **Creating Managed Apple IDs in Apple School Manager**

Tuesdays at 10:00 a.m. CT

Join us to learn how you can use Apple School Manager to create Managed Apple IDs—accounts designed specifically for schools that enable students and staff to personalize their device and access key services from Apple. These accounts are built for students of all ages, are intended to make it easy for schools to create and manage accounts at scale, and are designed to meet the privacy and security needs of schools. You'll also be able to participate in a live Q&A with an Apple system engineer. [Register >](#)

### **Buying Apps and Books in Apple School Manager**

Wednesdays at 10:00 a.m. CT

This session will provide everything you need to know about funding, purchasing, and distributing apps and books for iPad and Mac with Apple School Manager. Discover how to leverage education volume discounts, and learn tips and tricks on getting the most from Apple School Manager from an Apple system engineer during a live Q&A. [Register >](#)

### **Mac Deployment and Management**

Wednesdays at 11:30 a.m. CT

Join us to learn how to deploy and manage macOS Mojave, the latest operating system from Apple, and get a walk-through of its technical features. An Apple system engineer will review recent updates in how macOS works with device management solutions and Apple School Manager to help IT teams get Mac into the hands of their users seamlessly. [Register >](#)

### **What's New for IT—Summer 2019**

Thursdays at 10:00 a.m. CT

Apple's 2019 Worldwide Developers Conference (WWDC) hosted more than 5000 developers in San Jose. Major announcements were made about iOS, macOS, tvOS, and Apple School Manager. For enterprise and education, many of these announcements will have a big impact on what's to come over the next year. Let's take a look together at all of these new features and capabilities, while asking questions of an Apple system engineer in a live Q&A. [Register >](#)

### **macOS Mojave In Depth**

Thursdays at 11:30 a.m. CT

Join us as we explore the latest features, benefits, and technologies in macOS Mojave. We'll cover the new Dark Mode, Stacks, Finder enhancements, Continuity Camera, and more. You'll discover how you can take advantage of these new capabilities to increase productivity, efficiency, and creativity on Mac. [Register >](#)

### **Apple School Manager: Federated Authentication**

Fridays at 10:00 a.m. CT

Hear about the latest features for education in iOS, macOS, and tvOS. Discover how teaching tools like the Classroom and Schoolwork apps make it easy to guide how students use devices and apps in the classroom and provide insight into each student's progress. Explore Apple School Manager and see how support for federated authentication with Microsoft Azure Active Directory makes it easier than ever to integrate iPad and Mac with your existing systems. You'll also be able to participate in a live Q&A with an Apple system engineer. [Register >](#)
